Selective attention: our ability to focus on something that is going on while other, non-related things are going on around us. Divided attention: the type of attention we need to use when we are forced to do more than one task at a time. Mon, 14 Jan 2019 08:13:00 GMT Making sense of the environment - MCAT Review - Tom Andrews University College Cork. Abstract. Social Constructionism has been instrumental in remodeling grounded theory. In attempting to make sense of the social world, social constructionists view knowledge as constructed as opposed to created. Mon, 07 Jan 2019 21:57:00 GMT What is Social Constructionism? | Grounded Theory Review - Cognition is embodied when it is deeply dependent upon features of the physical body of an agent,

that is, when aspects of the agent's body beyond the brain play a significant causal or physically constitutive role in cognitive processing. Embodied Cognition (Stanford Encyclopedia of Philosophy) - Mental imagery plays a significant role in guiding how we feel, think, and even behave. These mental simulations are often guided by language, making it important to understand what aspects of language contribute to imagery vividness and consequently to the way we think. Using a foreign language reduces mental imagery ... -
